September 19, 2015

UMB School of Pharmacy Residents

Dr. Gina Stassinis was born and raised in Santa Barbara, California. She then moved to the Bay Area to complete her Bachelor of Arts in Molecular and Cell Biology from the University of California, Berkeley. She obtained her Doctorate of Pharmacy at the University of the Pacific in Stockton, California. After pharmacy school, she was ready to explore a new part of the country and moved to Chicago, Illinois to do a hospital pharmacy practice residency at Swedish Covenant Hospital. Dr. Stassinis then came to University of Maryland School of Pharmacy in Baltimore where she is in her second year of a two year clinical toxicology fellowship. In this fellowship, she is obtaining specialty training in the care of patients who are poisoned or have taken an overdose of drugs. In her spare time, she enjoys listening to music and running.

Dr. Ryan D'Angelo grew up in metro Detroit, MI and moved to Grand Rapids, MI to attend Grand Valley State University where he received his Bachelor of Science in Biomedical Sciences. He then attended Ferris State University and obtained his Doctorate of Pharmacy prior to moving to Baltimore, MD to complete his residency in Pharmacotherapy. His areas of interest include cardiology, infectious diseases and internal medicine. He plans to pursue a career in academia where he will practice in the hospital setting and teach pharmacy students. During his free time he enjoys playing lacrosse, golf and cooking.

Dr. Margaret Miklich was born and raised in Syracuse, NY where she quickly became an avid Syracuse University men's basketball fan. She moved to Baltimore, MD to attend Loyola University Maryland where she received her Bachelor of Science in Chemistry. Maggie spent the next four years pursuing her Doctorate of Pharmacy at the University at Buffalo School of Pharmacy and Pharmaceutical Sciences in snowy Buffalo, NY. She is grateful to live in Charm City once again as she finishes up her pharmacy training. Last year she was a resident at the University of Maryland Medical Center and this year she is a resident at the University of Maryland School of Pharmacy where she is specializing in Ambulatory Care. One day she hopes to manage patients' medication therapy and chronic diseases in a clinic setting and teach at a school of pharmacy. In her spare time Maggie enjoys traveling, reading, and trying new restaurants—she is on a quest to eat at all 50 of Baltimore's Best Restaurants.
